

RoadMate - Weekly Report – Week 5

Group A

Summary

The primary focus of this week was on developing the feature set of our second prototype.

Project Planning

As part of our project planning, the following was covered during this week:

- **Gantt Chart**

Lucia has updated our Gantt chart to reflect the current state of our project. *The latest version is available in the repository.*

Development Process

As part of our development process, the following was covered during this week:

- **Site Development – Prototype 2**

With respect to the current feature set of prototype two, this is the current state of RoadMate:

- **OpenID – Pending**
- **Update Profile Page – Pending**
- **Tidy and Standardise CSS – Pending**
- **Accept Ride Offers – Pending**

- **UI Test Cases**

Yizhang has been working with Selenium to develop test cases for the site. These will be transformed into unit tests, which will form part of our continuous integration process.

As the site grows they'll play an important role in ensuring changes don't introduce bugs or break other sections of the site.

- **ER-Model**

Dale's been updating our ER-Model to reflect the changes necessary for accepting ride offers.

Changes to Project Plan

- **OpenID Now Required**

Despite trying to argue the benefits of using Google Accounts over OpenID, we have been overruled. We're now taking the necessary steps to migrate over to OpenID.

I hope to maintain compatibility with Google Accounts in the event that this system sees the light of day and the users want a user-friendly login system.

Obstacles

None.

References

- **Report 1**

Our first report is now in the repository and details the state of our project up-to our first prototype. Sections include:

- **Design Methodology**
- **RMMM Plan**
- **Design Documentation**
- **Project Scope**
- **SQA Plan**
- **Gantt Chart**

- **Meeting Agenda**

All details of past and upcoming meeting are documented in a meeting agenda on Google Docs.

This covers the following for each meeting:

- **Location + Time**
- **Agenda** – items covered at the meeting
- **Minutes** – additional meeting notes
- **Group Tasks** – any group tasks issued at the meeting

I'm hoping to get each week's agenda into the repository. In the mean time if you require a link, please email me.
