

## Weekly Report: Week 4

---

### Documentation for Project Report Aug 8

Updated the ERD model to reflect some changes in the implementation (mostly attribute and entity names), and an explanation of our design methodology/development process, were my contributions to the group report.

### Glossary of Terms

Drafted a Glossary of Terms document so that the semantic of the terms we are using is understood by the whole team, and so it will hopefully be consistent throughout the application.

### Changes to the implementation

The rideoffer\_view page was updated to present the ride offer data in a clearer way. Some other aspects of the application were tidied up, some placeholder text was replaced, a current\_version element was added, and some changes were made to the css template.
