

## **Weekly Report: Week 12**

---

**Mail Notification** (4 hours)

Added email notification to the Accept Ride Request workflow. Testing and fixing bugs with all the email notifications, this took some time because every change needed to be pushed to the live server to verify it was working.

**Administration functions** (2 hours)

Testing and fixing some bugs on the administration) functions (cancel ride, withdraw from ride, approve passenger, etc.) that our user testing uncovered.

**User Manual** (10 hours)

Before the code review, I updated the user manual with design/layout that reflected the look and feel of the RoadMate web application, as well as more screenshots and more detailed information about each of the workflows (this was actually done on the Monday and Tuesday of Week 13).

Total - 16 hours

---
