Week10 report

Name: Yizhang Yin

ID: 06180043

Tasks for this week:

1. Calendar delete events function

2.testing new code

My works for this week:

1.1 tidy calendar javascripts code.
    Delete unwanted folders from repository.
    Add new folder call scripts and put all javascripts and library into this folder.
    Add new calendarbase.html file. So calendar javascripts does not have any dependency
with base.html.
    Time spend: 1 hours

1.2 complete the function of deleting calendar events
    System read future events from users' calendar and user can click delete button to
delete unwanted events.
    Time spend: 8 hours

1.3 modifid the layout of cal_Auth.html page
    Make display view more readable.
    Time spend: 1 hours

1.4 Add more commence into javascripts code .

2.2 Start new test case:
    Time spend: 2 hours
    Problems: find defect in ride offer page. If user select wrong date such as 31/11/2008

    System is fail to prompt hits.
