**Week 9 report**

Name: Yizhang

ID: 06180043

**1 Main Task:**

   1.1Fixed remaining problems from google calendar integration.

   1.2Test it using different browsers

   1.3Add reading events entry function

**2 The jobs has been done:**

  2.1 Some javascripts  not work for IE .

   eg: "document.getElementByID("some_id").style.display="none" . is not work for IE 7.

   eg:  document.getElementByID("some_id").innerHTML="<hr/>...."
  If you try to set up inner text use above way, such as <hr/> can not be parsed by IE 7.

  I have solved IE problems with javascripts .

 Time spend : 7 hours

 2.2 Test code by IE7 and FireFox 2.0

  Time spend: 1 hours

 2.3 Add reading events function to google calendar view page

   After successful get auth token , page automatically shows user's ride events

 problems: still has some trouble with IE . FireFox is working fine but IE can not parse
some html character when I use javascript to write html character to web page.
       The basic function is working fine , but I still need to do some layout format.

  Time spend : 15 hours

 2.4 Add functionality send notification by email and pop-up message

  These functions have been successfully implement.
  Time spend : 7 hours
